

Setting the standard for environmental protection

# TÜV NORD CERT – Certification as “Carbon Neutral Event”

Climate change is a vital issue and more and more people are demanding an economy that is truly sustainable with all sectors taking responsibility for the environment. This awareness is no longer solely directed towards industry and manufacturing companies: when visiting events, an increasing number of visitors want to avoid unnecessary damage to the climate.

This is why TÜV NORD CERT offers companies and all other types of event organisers the opportunity to have their event examined with regard to climate protection: with certification as “Carbon Neutral Event” and the associated test

mark, climate protection measures can be documented and effectively communicated to the public.

#### Target groups for certification

Certification is directed towards commercial and private event organisers who are committed to climate protection and want to demonstrate this through the carbon neutrality of an event. A further aim is image enhancement through the focus on sustainability and climate protection.

#### Benefits of certification

TÜV NORD CERT certification and the “Carbon Neutral Event” test mark positions event organisers as being committed to climate protection, appealing particularly to visitors who are environmentally aware. Monitoring of emission sources also opens up savings potentials for future events, offering tangible financial benefits.

#### Prerequisites for certification

The prerequisite for certification is creation of a carbon footprint of the respective event in accordance with TÜV NORD standard TN-CC 015. This can be performed by the manufacturer himself or by a consultant. Certification includes verification of the carbon footprint of the event. Valid CO<sub>2</sub> certificates from climate protection projects should also be available in order to compensate for the CO<sub>2</sub> emissions which have been calculated.

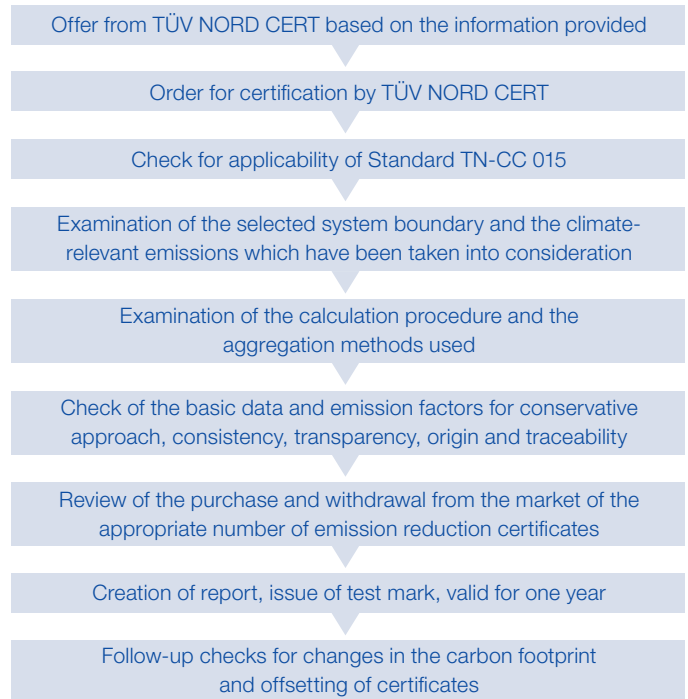

### Our know-how for your success

TÜV NORD CERT is a well-established and reliable partner for inspection and certification services. Our experts and auditors have extensive knowledge based on experience and are generally permanently employed by TÜV NORD. This guarantees independence and neutrality, and also means we can offer continuity in supporting our clients. The benefit to you is clear: our auditors accompany and support the development of your company and provide you with objective feedback.

TÜV NORD CERT has comprehensive knowledge and also national and international references in the area of climate protection. We are accredited by the United Nations Framework Convention on Climate Change (UNFCCC) to validate, verify and certify international climate protection projects. To date we have performed these services for around 1,000 projects (Clean Development Mechanism, Joint Implementation, Voluntary Offset).

### The route to the certificate

### Are you interested?

Please send us your response by fax.

We are looking forward to hearing from you.

Yes, I am interested in “Carbon Neutral Event” certification. Please contact me.
